

Dear Team,

I hope this message finds you well. My name is **Sasikumar Pichairaj**, and I am writing to express my interest in the **Quality Automation Engineer** position within your organization.

I am excited to apply for the QA Automation Engineer position. With **5 years of experience** in manual, UI automation, and API testing, I have built and enhanced automation frameworks using **Selenium WebDriver, Java, TypeScript, TestNG, Cucumber, and REST Assured** to deliver reliable, high-quality software across enterprise and digital marketing applications.

In my current role at Accenture, I automated **500+ UI and API test cases**, reduced regression execution time by **30%**, and integrated automation suites into **Jenkins CI/CD pipelines**, helping accelerate release cycles while improving product quality. I enjoy solving complex testing challenges, collaborating with cross-functional Agile teams, and continuously improving automation processes.

What excites me most about this opportunity is the chance to contribute my automation expertise while learning from a talented team and building scalable, maintainable testing solutions that make a real business impact.

Thank you for your time and consideration. I look forward to the opportunity to discuss how my experience and enthusiasm can contribute to your team.

Best regards,

Sasikumar Pichairaj
